

Getting started

You need:

- pack of cards
- pen
- playing schedule from www.beercraft.de
- beer, shots (necessary number is displayed on schedule)

Print out the schedule and this manual and hang it out where everyone can see it.

Every player takes a card which determines his or her race.

	Male	Female
Red	Giant	Fairy
Black	Dwarf	Amazon

Please make sure that there are at about as many giants as dwarfs resp. amazons as fairies

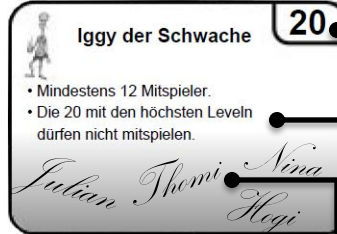

World of Beercraft

The enemies

• **The hit points:** Every enemy has a specific amount of hit points. The sum of levels of all party members must beat that number.

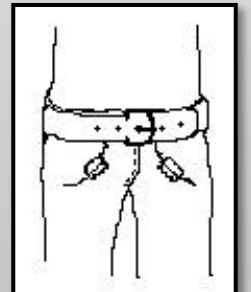

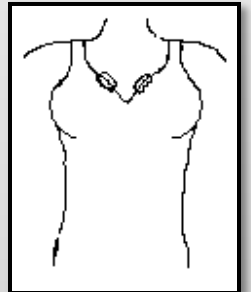

• **Special requirements:** You are only qualified to fight the enemy if your party meets them.

• **The party:** You can list all the brave ones who helped to defeat the enemy here.

Tip

To show your level to everyone you should clamp the crown caps to your cloth by using pliers.

Purpose of the game

Free the helpless virgin from the claws of the cruel monster „Neo – the fat hangover“!

Therefore you have to eliminate all of his myrmidons one by one. You can only prevail as a team. So form up adequate parties to fight your enemies.

This way, eliminate all monsters and finally face their master. After he is defeated your mission is completed. However, even after the end of the game one thing is obvious: the higher your level, the higher your reputation!

Gameplay

During the game you increase your level by drinking beer and collecting the associated crown caps.

Number of crown caps = Level

When your levels are high enough you can begin to fight the enemies. A monster is defeated if a party that meets the requirements comes together at the schedule and everyone drinks a shot. This shot, however, will only improve your reputation, not your level!
